MD. Taki Yasir Faraji Sadik

Cybersecurity and IT Infrastructure Professional

North York, ON, Canada | taki@tyfsadik.org | tyfsadik.org | linkedin.com/in/md-taki-yasir-faraji-sadik-63a026278 | github.com/TYFSADIK

PROFESSIONAL SUMMARY

Cybersecurity and IT infrastructure professional in Toronto, currently an IT Support Technician at Amico Group of Companies and a contract Data Center Engineer at Microsoft. Hands-on across the stack: user and identity support in Active Directory, Entra ID and Microsoft 365; Cisco Meraki and VoIP networks; SOC alert triage in Splunk and AlienVault; data center hardware; and Linux, Windows Server, Kubernetes and Proxmox infrastructure. Completing a postgraduate program in Cyber/Electronic Operations at Seneca and a B.Eng in Information Technology at the University of Toronto, with 25+ industry certifications. Outside work, runs a 7-node Kubernetes homelab, has published 116 hands-on IT labs, builds and tests software, and runs a Canadian defence hardware program of eleven sensor and robotics builds mapped to real Canadian Armed Forces requirements.

SELECTED ACHIEVEMENTS

- **Cut SOC alert MTTR by 25%** as Incident Manager for Shield Security Systems at the CN Tower by mapping the triage workflow across Splunk and AlienVault, finding 3 bottlenecks, and shipping automated enrichment pipelines.
- **Automated 30+ daily security alerts** with Python and Splunk SPL correlation, human-in-the-loop checkpoints for high-severity alerts, and runbooks for junior analysts.
- **Kept healthcare systems at 99%+ uptime** at CardiOCare with a VLAN-segmented network and documented data flows for compliance.
- **Collapsed multi-day Azure provisioning into minutes** at Fiera Foods with Terraform modules and GitHub Actions.
- **Built a 7-node Kubernetes cluster** on Proxmox hosts with VLAN segmentation, Calico, MetalLB, Longhorn, and Prometheus, Grafana and Loki.
- **Built and tested four software projects** (PHP 8, JavaScript, Godot 4) with 70+ automated tests between them, and contributed multi-architecture ELF analysis to the open-source REA reverse-engineering tool.
- **Published 116 hands-on IT labs** across nine tracks, each with real commands, expected outputs and validation checks.

TECHNICAL SKILLS

IT support and identity	Microsoft Active Directory, Microsoft Entra ID (IAM, RBAC, Conditional Access), Microsoft 365, Exchange Online, Microsoft Teams, user onboarding and offboarding, permissions, ticketing and ITSM (ServiceNow), SLAs, Tier 1 and Tier 2 support, ERP support (SAP, BV, Spire)
Endpoints and servers	Windows 10 and 11, Windows Server 2022 and 2025 (AD, DNS, DHCP, file and print servers, Group Policy), Linux (Ubuntu, RHEL, Arch, Debian), PCs, laptops, IP phones, mobile devices, printers, CNC equipment, server monitoring, backups, patch management
Networking	Cisco and Meraki, Cisco VoIP, VPN, LAN, WAN, Wi-Fi (802.11), TCP/IP, VLANs (802.1Q), inter-VLAN routing, firewalls, routing and switching (CCNA in progress), Cisco IOS, SDN, DNS (Pi-hole and Unbound), DHCP, NAT, Wireshark, Nmap
Security and SOC	SIEM (Splunk, AlienVault), Splunk SPL, EDR, IDS and IPS, MITRE ATT&CK, OWASP Top 10, threat intelligence, incident triage and lifecycle management, vulnerability management, digital forensics (live and dead box), CCTV and IP surveillance, OPSWAT ICIP, Mastercard cybersecurity framework, Trivy
Cloud and virtualization	Microsoft Azure (AZ-900), AWS (Cloud Practitioner, Cloud Security), Terraform, GitHub Actions, OAuth 2.0, Proxmox VE, KVM, LXC, ZFS, VMware, Hyper-V, VirtualBox, Docker, Docker Compose, Cloudflare Tunnel, Tailscale

Kubernetes and observability	Kubernetes (kubeadm), Calico, MetalLB, Longhorn, Nginx Ingress, cert-manager, Helm, RBAC, Prometheus, Node Exporter, Grafana, Loki, Promtail, ELK Stack
Software and scripting	Python, Bash, PHP 8, JavaScript (ES modules), HTML, CSS, SQL, GDScript (Godot 4), Rust, TypeScript, Git and GitHub, PDO, Node test runner, Playwright, automated testing
Databases	MySQL, MariaDB, PostgreSQL, SQLite, MS SQL Server, Azure SQL, backup and recovery
Defence hardware and robotics	SDR (KrakenSDR, RTL-SDR), passive radar (pyAPRiL), ADS-B and AIS, ROS 2 (robot_localization EKF), ArduPilot and Pixhawk, ESP32 and LoRa mesh (915 MHz), Raspberry Pi, acoustic beamforming (GCC-PHAT), edge AI (Hailo AI HAT+), thermal imaging (FLIR Lepton), TPM 2.0 secure boot, signed OTA updates, MQTT, Kalman-filter sensor fusion

WORK EXPERIENCE

INFORMATION TECHNOLOGY AND SECURITY

Amico Group of Companies **July 2026 to Present**
IT Support Technician *Richmond Hill, ON*

- Manage and support user accounts in Microsoft Active Directory and Entra ID.
- Manage user mailboxes and accounts in Microsoft Exchange Online.
- Manage and support Microsoft services, including Teams, DNS, DHCP, and file servers.
- Manage and support user permissions, as well as user onboarding and offboarding processes.
- Install, configure, and support PCs, laptops, IP phones, mobile devices, printers, servers, and CNC equipment.
- Install, configure, and troubleshoot hardware and software.
- Support Windows Server 2022 and 2025, as well as Windows 10 and Windows 11 environments.
- Provide technical support for Microsoft 365 applications.
- Assist with the installation, configuration, and troubleshooting of network technologies, including VPN, LAN, WAN, and Wi-Fi.
- Troubleshoot and resolve network connectivity issues in Cisco Meraki environments.
- Provide technical support for ERP systems, including SAP, BV, and Spire.
- **Technologies:** Microsoft 365 applications and services; Active Directory and Entra ID with DNS, DHCP and print servers; Exchange Online and Teams; Cisco and Meraki networking; ticketing systems; Cisco VoIP; VPN; network switches, routers and firewalls; storage, servers and workstations.

Microsoft **Sep 2025 to Present**
Data Center Engineer (Contract) *Toronto, ON*

- Apply Cyber Threat Intelligence (CTI) guidelines to daily data center operations, keeping physical infrastructure resilient against emerging hardware and network-level threats.
- Audit server racks, cabling, and local network equipment to detect anomalies, rogue devices, or unauthorized Layer 1 connections.
- Execute urgent firmware updates and hardware remediations on bare-metal servers based on active Indicators of Compromise (IoCs) and threat feeds.
- Partner with engineering and SOC teams to turn high-level threat intelligence into practical security procedures for on-site hardware deployments.

Shield Security Systems **Aug 2025 to Aug 2026**
Incident Manager and Armed Security Guard *CN Tower and Cinema Tower contracts, Toronto*

- **Incident Manager, Aug 2025 to July 2026.** Led the end-to-end incident lifecycle, including detection, triage, prioritization, escalation, resolution, and post-incident review.
- Monitored SIEM (Splunk, AlienVault), EDR and IDS alerts, mapped them to MITRE ATT&CK techniques, and escalated events according to defined SOPs.
- Mapped the end-to-end SOC alert triage workflow across Splunk and AlienVault, found 3 bottlenecks, and shipped automated enrichment pipelines that cut mean time to respond (MTTR) by 25%.

- Wrote Python scripts and Splunk SPL correlation searches that add threat-intelligence context to each alert and filter known false positives, processing 30+ daily alerts with minimal manual work.
- Designed human-in-the-loop validation checkpoints so every high-severity alert gets an analyst's review before any automated action, with safety guardrails on the automation.
- Wrote runbooks that let junior analysts work alerts independently, from first triage to escalation.
- Documented incidents end to end and produced post-incident reports for management and stakeholder review.
- **Armed Security Guard, Nov 2025 to Aug 2026 (part-time, on call).** Armed security posted at the CN Tower and at Cinema Tower; also covered security operations centre (SOC) shifts when needed.

Microsoft **May 2025 to Sep 2025**

Cloud Support Engineer (Internship) *Dominion Centre, 222 Bay St., Toronto*

- Provided cloud support engineering on site at Dominion Centre, 222 Bay St., Toronto.

CardiOCare **Jan 2025 to Sep 2025**

Network Analyst Intern *Greater Toronto Area (Hybrid)*

- Architected a VLAN-segmented network that kept healthcare systems at 99%+ uptime; documented data flows for compliance and operational continuity.
- Deployed firewalls, VPNs, and least-privilege access policies; used Wireshark packet analysis to diagnose complex failures.
- Monitored and maintained network infrastructure, finding and resolving connectivity and performance issues.
- Performed packet analysis and traffic monitoring with IDS to detect anomalies and support incident investigations.
- Assisted with network documentation, topology diagrams, and capacity planning.
- Supported deployment and configuration of network hardware and cloud-connected devices.

TD **Oct 2024 to Jan 2025**

IT Support Help Desk (Contract, part-time) *Vaughan, ON*

- Provided IT service delivery and technical assistance to TD employees, keeping downtime minimal for critical banking operations.
- Managed the full lifecycle of IT support tickets in ITSM platforms (e.g. ServiceNow) within enterprise SLAs.
- Troubleshot and resolved Tier 1 and Tier 2 software, hardware, and network connectivity issues in a secure, regulated environment.

Fiera Foods **Jun 2024 to Jul 2025**

Server Operator, Junior (Contract, part-time) *North York, ON*

- Architected Terraform modules with GitHub Actions for self-service Azure infrastructure provisioning, collapsing multi-day provisioning into minutes.
- Administered Entra ID IAM, RBAC, and Conditional Access; implemented OAuth 2.0 and certificate-based authentication across business systems.
- Connected cloud storage, compute, and identity platforms through APIs and automation scripts, reducing manual errors and improving deployment reliability.
- Managed server alerts and system issues on Linux and Windows Server with priority-based response, keeping first-time fix rates high.
- Performed daily maintenance: backup verification, system updates, patching, and performance monitoring.
- Used SQL and cloud skills to support data workflows and reporting systems.
- Documented recurring issues and contributed to the operations team's runbooks.

Elite Force **Sep 2022 to Nov 2023**

Surveillance Operator, Rogers Centre Help Desk (Contract, part-time) *Toronto, ON*

- Monitored multi-camera CCTV and IP surveillance systems across commercial facilities for 24/7 security coverage.
- Conducted continuous CCTV monitoring of high-security premises, identifying anomalies, unauthorized access, and physical threats.
- Executed rapid incident response protocols, escalating verified threats to on-site security teams and management in real time.
- Monitored hybrid physical and digital access points, cross-referencing video with access logs.

- Maintained surveillance logs and produced shift incident reports for management review.

Elite Security **Jan 2022 to Apr 2023**
Surveillance Operator *Dhaka, Bangladesh*

- Monitored CCTV systems and performed regular property inspections across commercial facilities.

IKU Digital **Feb 2021 to Dec 2023**
Executive Editor (Full-time) *Motijheel, Dhaka, Bangladesh*

- Directed digital publication operations, overseeing backend databases for the integrity, organization, and fast retrieval of digital assets.
- Administered digital platforms and content management systems, configuring user access controls, permissions, and workflows.
- Bridged technical and creative teams, troubleshooting platform issues and optimizing database structures to improve site performance.

RETAIL, HOSPITALITY AND OTHER

H&M **Dec 2025 to Present**
Visual Manager (Contract, full-time) *North York, ON*

- Promoted from Customer Service Specialist; manage visual merchandising and in-store presentation.
- Administer AWS-backed retail systems for store operations.

H&M **Jan 2026 to Present**
Department Supervisor (Permanent, part-time) *North York, ON*

- Supervise daily operations; trained non-technical staff on new systems, improving team efficiency and cross-team communication.

H&M **Apr 2025 to Present**
Sales Representative (Permanent, part-time) *North York, ON*

H&M **Jul 2025 to Dec 2025**
Customer Service Specialist *North York, ON*

- Resolved customer issues with orders, payments, and accounts; escalated complex cases through CRM tools.
- Used AWS-backed retail systems and internal network services to access customer data and resolve cases efficiently.

St. James's Gate Irish Alehouse **Apr 2024 to Jul 2024**
Commissary Updater (Contract, part-time) *Etobicoke, ON*

- Tracked kitchen supplies, ingredients and beverages to keep the team continuously stocked.

Restaurant Lucie **Jan 2024 to Apr 2024**
Dishwasher (Contract, part-time) *100 Yonge St, Toronto*

- Supported kitchen operations in a fast-paced downtown restaurant.

PROJECTS, HOMELAB AND OPEN SOURCE

Canadian Defence Hardware Program **2026**
tyfsadik.org/work/defence/defence-hardware-program.html

- Eleven sensor and robotics builds across sky, water, and ground, most already built and the rest nearly finished, each mapped to a stated Defence Drone Initiative or Army MINERVA requirement, with full parts lists, prices and build guides.
- Includes a KrakenSDR passive radar node scored against ADS-B ground truth, a hydrophone vessel monitor with AIS ground truth, a solar ESP32 LoRa seismic and acoustic mesh, ROS 2 GPS-denied rovers and a convoy on a degraded mesh, a thermal search-and-rescue drone, a passive acoustic drone detector, a cold-soak battery rig, TPM 2.0 secure fleet updates, an airspace deconfliction manager, and a multi-domain common operating picture.
- Six further build guides published against Canada's 2027 MINERVA and IDEaS calls (Arctic ISR drone, snow cargo UGV, seabed-survey boat, counter-drone scoring harness, secure fleet autonomy, sovereign AI enclave).

Kubernetes Infrastructure **2025 to 2026**

tyfsadik.org/work/infrastructure/kubernetes-infrastructure.html

- Seven-node Kubernetes cluster (kubeadm on Ubuntu Server VMs) across Proxmox hosts: 3 desktop PCs and 4 laptops.
- Three VLANs (management, cluster, storage) with 802.1Q trunking; Calico CNI with NetworkPolicy; MetalLB L2 load balancing; Longhorn replicated storage.
- Observability with Prometheus, Node Exporter, Grafana alerting, and Loki with Promtail log aggregation.

Zero-Trust Proxmox Private Cloud **2025**

tyfsadik.org/work/infrastructure/proxmox-zero-trust.html

- 3-node Proxmox HA cluster behind Cloudflare Tunnel with Tailscale fallback and automated 30-day ZFS snapshot retention; no public IP exposure.

GateArch: student portal in PHP 8 and MySQL **2023, rebuilt 2026**

github.com/TYFSADIK/gatearch

- No framework: PDO prepared statements only, password hashing, per-user and per-IP login throttling, session hardening, CSRF tokens, CSP, role guard on every page, audit log.
- 25 unit and integration tests plus 31 end-to-end browser checks; Docker Compose stack.

TaxGlobe: Canadian income tax calculator **2023, rebuilt 2026**

github.com/TYFSADIK/taxglobe

- All 13 provinces and territories for 2023, with basic personal amount credits, Ontario and PEI surtaxes, the Ontario Health Premium and the Quebec abatement.
- 11 tests, including a match to the published 2023 top tax rate of every jurisdiction.

Wonder Learning: e-learning platform **2023, rebuilt 2026**

github.com/TYFSADIK/wonder-learning

- Six video courses on the YouTube iframe API with automatic completion, resume playback and quizzes; progress in localStorage. 9 unit tests and 16 browser checks.

Depot Gato: Godot 4 tower defense game **2024, rebuilt 2026**

github.com/TYFSADIK/depot-gato

- NavigationAgent2D enemies on a TileMapLayer navigation mesh, data-driven waves, signal-based HUD, pixel art in code.
- 28 headless tests, including three complete games the test plays itself to check navigation and balance.

REA open-source contribution **2026**

github.com/morluto/rea/pull/4871

- Pull request (open, under review) extending the ELF layout analysis of the REA reverse-engineering MCP tool from x86-64 to eight CPU architectures in 32 and 64-bit and both byte orders, with 12 verification fixtures.

Chakor: self-hosted AI workspace **2026**

tyfsadik.org/work/infrastructure/chakor.html

- Open-source, self-hosted AI workspace built with Next.js 15, TypeScript, SQLite, llama.cpp and Ollama.

Self-hosted services **2024 to 2026**

tyfsadik.org/work.html

- Private AI model (ai.tyfsadik.org, Ollama, Docker, TLS, ELK), Nextcloud cloud storage (cloud.tyfsadik.org), Immich photo server, SearXNG search (search.tyfsadik.org), Kiwix Wikipedia mirror (wiki.tyfsadik.org), Pi-hole with Unbound DNS, and a mail setup with DKIM, SPF and DMARC.

116 hands-on IT labs **2025 to 2026**

tyfsadik.org/blog/labs/

- Nine tracks: Linux Fundamentals (24), Linux Server Administration (12), Networking (16), Security (18), Python Automation (14), Databases (8), Cloud and Azure (9), Containers and Kubernetes (9), Version Control and DevOps (6).

Arch Linux Remote Desktop via WSL2 **2025**

github.com/TYFSADIK

- Full Arch Linux and XFCE remote desktop through WSL2 without router port forwarding; open source, 5 GitHub stars.

HomeBound Aisha **2023**

github.com/TYFSADIK

- Responsive website designed and delivered for a real client; 4 GitHub stars.

CERTIFICATIONS AND LICENCES

Cybersecurity Defense Analyst	Cisco	May 2026
Computer Networks and Network Security	IBM IX	Apr 2026
IBM IX Operating Systems: Administration and Security	IBM IX	Apr 2026
Certified Information Professional (CIP)	OPSWAT Academy	Mar 2026, expires Feb 2027
Critical Infrastructure Protection (ICIP)	OPSWAT	Mar 2026, expires Mar 2027
Cisco Routing Course	APNIC Academy	Mar 2026, expires Mar 2029
Diploma in Ethical Hacking	Alison	Mar 2026
Cybersecurity Virtual Experience	Mastercard (Forage)	Mar 2026
EASY Framework for Threat Intelligence	AttackIQ	Mar 2026
Introduction to Model Context Protocol	Anthropic	Mar 2026
Foundations of Cybersecurity	Google	Feb 2026
Cybersecurity Tools and Cyberattacks	IBM	Feb 2026
Accelerate Your Job Search with AI	Google	Feb 2026
AWS Academy Graduate, Cloud Security	Amazon Web Services	Nov 2025
AWS Cloud Practitioner	Amazon Web Services	Active
Azure Fundamentals (AZ-900)	Microsoft	Active
MSSQL Certification	Microsoft	Active
CCNA Fundamentals	Cisco Networking Academy	Active
CompTIA A+	CompTIA	Active
CompTIA Security+	CompTIA	In progress
ISC2 Certified in Cybersecurity, candidate	ISC2	Aug 2025 to Aug 2026
Business Case for Workplace Wellness	CCOHS	Jun 2025
Integrity in Action	Seneca	Jun 2025
Plagiarism and Citation	Seneca Polytechnic	Jun 2025
Ontario Security Guard Licence	Government of Ontario	Active, #50059604
Smart Serve Ontario	Smart Serve Ontario	Active, #240328413205, expires Mar 2029
First Aid and CPR		Active

EDUCATION

University of Toronto **Jan 2023 to Dec 2026**

Bachelor of Engineering, Information Technology *Toronto, ON*

GPA 3.56. Coursework includes security incident response, open systems administration, software-defined networks, wireless networks, databases, Microsoft cloud technologies (Azure), Linux administration, static and dynamic networks, and on-premises and cloud systems projects.

Seneca College of Applied Arts and Technology **Jan 2024 to Apr 2026**

Postgraduate, Cyber/Electronic Operations and Warfare *Toronto, ON*

GPA 3.92

Alison Academy **March 2025**
Diploma, Ethical Hacking *Galway, Ireland (online)*

Scarborough Training Centre **2024**
CompTIA A+ Certified Professional Course *Toronto, ON*

VOLUNTEERING

Bangladesh National Cadet Corps **Mar 2016 to Present**
Cadet
Civil rights and social action; leadership training, discipline, community service and national defence awareness. "Once a Cadet, always a Cadet."

Association of Top Achiever Scouts Bangladesh **Jan 2012 to Present**
President Scout
The highest rank in scouting; community service leadership, outdoor skills and civic engagement for over 14 years. "Be Prepared."

LANGUAGES

English (fluent, professional), Bengali (native), Urdu (conversational), French (basic)
